

The Benefits of a school Nursery Class

Choosing a Pre-school Education for your child can be overwhelming. There are many excellent options available within our area both in private settings and within schools.

- The benefits of our Nursery are a fully qualified teacher and teaching assistant.
- Although we operate within loose topics, we follow the children's interest and adapt to meet their needs.
- We have specialist training to educate children with additional needs.
- We offer flexible hours with the availability of extended hours from 7:30a.m - 5:30p.m, the breakfast and after school club can be accessed on a day to day basis.
- Children are given access to high quality activities that further develop their abilities across all areas of the curriculum.
- Children choose to take part in Adult led activities which are matched to the children's learning style.
- Nursery hours are not statutory so, if you wish to have a family day or holiday during term time you can without requesting permission.
- In our school Nursery we understand that children develop at different rates and will support you with toilet training your child when they are ready.
- Children are given the opportunity to develop relationships with 'buddies' from different age groups.

"Excellence in all, for all"

- Parents are welcome into Nursery at any time and settling sessions are planned around your child's needs. Some children will attend for short periods with parents and build up their time as they are ready. We have no set expectations as we understand that all children are different and have different needs.
- All activities are planned through play. The children are continually learning and moving on as these play opportunities are extended by professional Early Years Specialists.
